This is
TIBO

British Hi-Fi is known all over the World for making great audio products with perfect sound - This is the TIBO way.

We have been creating great Hi-Fi products for more than 30 years, and we have always had one simple goal in mind - namely to develop affordable, great sounding products with a modern design. We achieved this by using traditional craftsmanship and natural materials in combination with the latest technology at component level. The catalogue in your hand is a celebration to all music lovers, who appreciate outstanding sound wrapped in exquisitely designed products.

TIBO are one of the very few companies around the World to have worked hard to incorporate latest Hi-Fi audio Streaming technologies, such as Bluetooth and Wi-Fi, into most of our products without compromising on sound quality. Our traditional separates range has been totally updated to Smart Audio so that today you can enjoy exceptional Hi-Fi stereo in the lounge through streaming services such as TIDAL & Spotify in a perfect High-Resolution Audio format.

We have extended the separates Smart Audio range into single standalone stereo products, which can be placed anywhere in the home or even be enjoyed outside courtesy of the internal rechargeable battery.

Great sound - That's TIBO.

PHILOSOPHY

Our products are designed and developed in-house here in the UK to ensure reliability, great design and perfect sound.

Only audio products with the perfect fusion of quality sound reproduction, technological innovation and supreme style can wear the TIBO badge. TIBO accomplishes this by combining its deep understanding of music, acoustics and electronics with an obsession for superior, affordable sound.

Each of the individual components of the TIBO Smart Audio range has been manufactured with these standards in mind. Every product has been engineered to partner and work in synergy with others in the series, impeccably balanced for the maximum entertainment experience and enjoyment.

TIBO Vogue 3

SOUND

We have been developing audio products since 1994 and our designs have been appreciated all over the World. Our engineers have spent an enormous amount of time in our listening room trying to recreate the true sound of live music.

By using key high-quality components, combined with new developments in speakers and amplifier technologies, we have moved the goal posts several times and have achieved a true range of Smart Audio products supporting high resolution audio, whether the product is our more traditional Hi-Fi stereo products or a single speaker unit - All at affordable prices.

Whole House Multiroom System

Add a range of TIBO Smart Audio products around your home and play music either directly to each speaker via Bluetooth or use the TIBO app and play different songs in different rooms via Wi-Fi.

Build Your Own System

The TIBO Ecosystem lets you combine traditional Hi-Fi products with single speakers all around your home

Fully Expandable - Up To 16 Devices

The TIBO Smart Audio system lets you control up to 16 different multiroom products around your home - all managed within the TIBO app.

Multiple Inputs

Playback Hi-Fi quality music via Bluetooth, Wi-Fi or Line inputs and share all over the home to any TIBO Smart Audio product.

Futureproof Technology

All TIBO Smart Audio products will automatically be updated when new technologies become available.

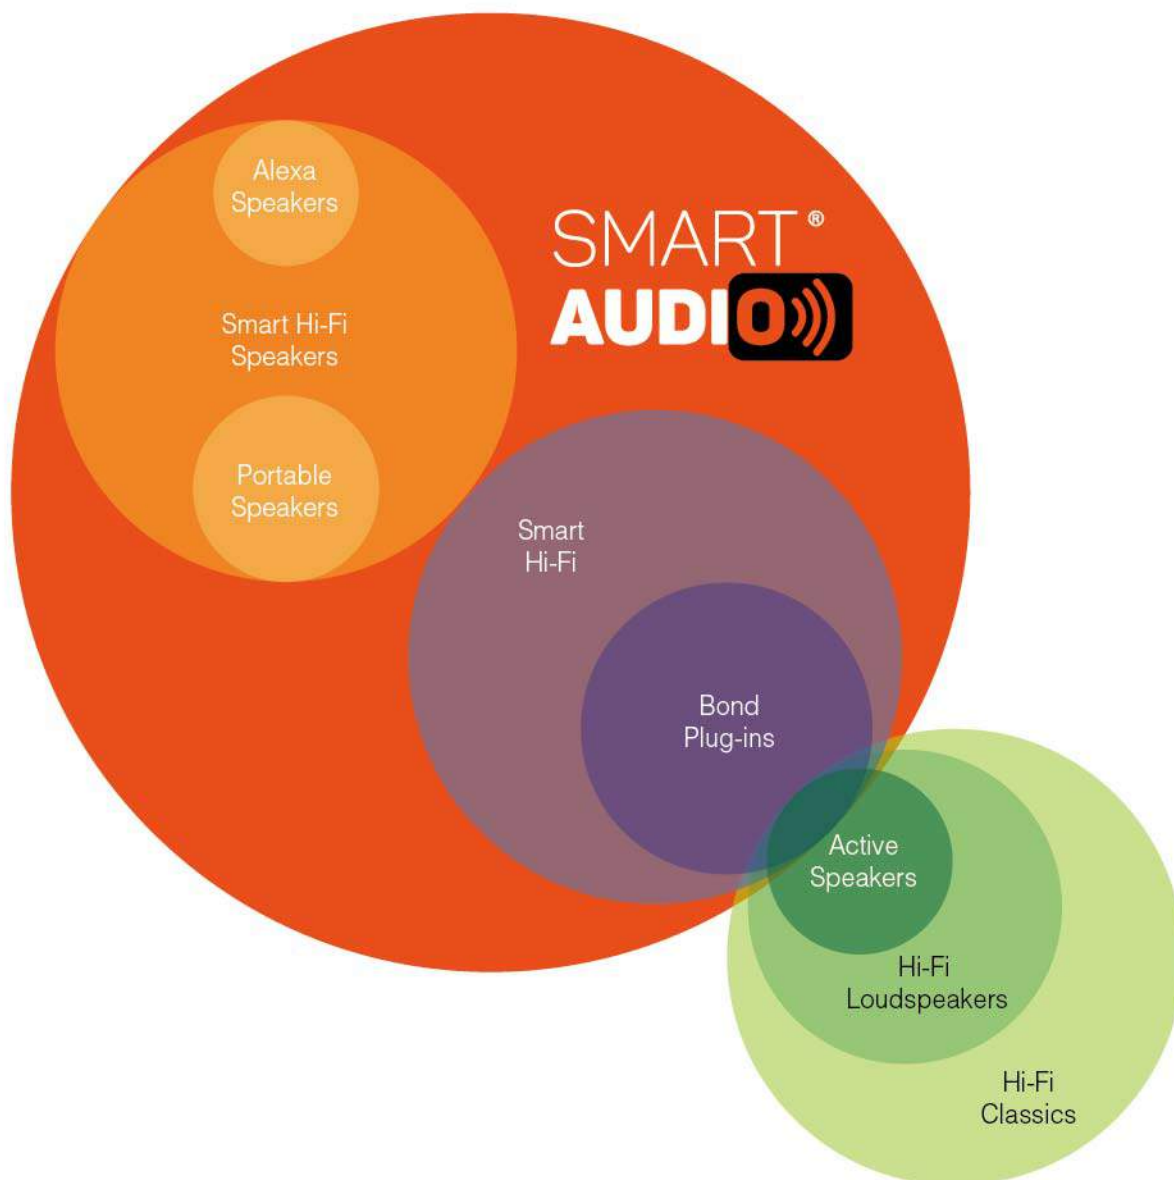

Countless Internet Radio Stations

Choose your favourite Worldwide digital radio stations and store a minimum of 5 stations as presets for easy access.

ECOSYSTEM

Whether you are building your premium audio system from scratch or you simply want to upgrade to Smart Audio we have it all covered. You can build up great sounding music system simply by starting with one of our battery / mains operated speakers, which can be used both in and outdoor and as a single speaker.

Alternatively, you can create a system by adding one of our Bond products to your existing products. We have even created a product supporting Powerlink for active speakers. Finally, you can create a more traditional Hi-Fi stereo system and connect CD, DAB, TV etc. which then can be shared over the TIBO Smart Audio system to different rooms.

By using different materials for the individual products, we have ensured that our products match most decors and room sizes. The only thing you have to do is sit down and listen - We have done all the hard work in creating the vast TIBO Ecosystem.

Play To One Or Play To All

Controlling the TIBO range of Smart Audio products could not be easier. You can wirelessly stream audio either by using Bluetooth to one product or by streaming through the TIBO app from multiple sources including iTunes, Spotify, TIDAL, Napster, TuneIn, iHeartRadio and more. By using the app, you will not only be able to control what you listen to in each room but also be able to group products together and adjust volume up and down via the app.

You can connect the speaker either via Wi-Fi or Bluetooth but there's also an auxiliary port so you can play music stored on devices that don't have Bluetooth or Wi-Fi

With the deceptively simple TIBO Smart Audio family of products, users can create a multiroom, multiplay sound system via TIBO app in seconds . All TIBO Smart Audio products feature the following technologies:

"There are buttons on TIBO Sphere 2 that let you play, pause and skip tracks as well as adjust the volume - the speaker even has five presets that you can assign to various streaming services and playlists!"

**"The Vogue 3 is a fine wireless speaker.
Offers versatility and compatibility others don't."**

"I found the TIBO Sphere 4 black version of this speaker to be more than aesthetically pleasing. The speakers and control panels are still round, giving a lovely juxtaposition to the housing that the speakers actually sit in."

"TIBO app is really easy to set-up and loud/noisy with a superb thump, thanks to a bass port at the back. I'm really impressed with it."

What The Critics Say...

"There are buttons on Sphere 4 that let you play, pause and skip tracks as well as adjust the volume - the speaker even has five presets that you can assign to various streaming services and playlists!"

"I am bound to say the TIBO Kameleon 6 sound pretty good to me, there's bags of power here, low end thump and the detail is really impressive if you care to listen closely."

"TIBO Bond Mini is a great solution to the modern problem of upgrading old stereos, without spending hundreds of pounds. This is a really great upgrade to an old style system for the price."

"The Sphere 4 control panels are still round, giving a lovely juxtaposition to the housing that the speakers actually sit in."

TIBO Legacy 5+ & SIA75 - The Amazing Speaker Combination!

"The bigger brother to the TIBO Kameleon 4, you get all the benefits of the smaller speaker but with a more powerful sound that will easily fill your room."

"Bond Mini sound performance is really good, resolution is fine."

"TIBO SIA50 added their multiroom networking device to the unit, and let me start by saying, it works quite well."

"TIBO SIA50 The build quality is quite amazing. Aluminium cabinet and nice terminals and measures only 190 x 52 x 139mm (WxHxD). Easy access to direct presets on the front and the volume knob."

“I love this crazy TIBO Bond Mini.”

“Kameleon 6 sounded great. The quality of sound was perfect, being crisp and clean and with plenty of bass. The speaker is certainly 'room-filling' and, thanks to the WiFi connectivity, it can pair with other compatible speakers, to act like a group; all streaming the same track.”

“The Sphere 2 is a stylish speaker”

“There’s a good amount of detail here too, setting synthesizers and electric instruments against the acoustic percussion in a decent amount of space without them sounding at all detached.”

“I really cannot see what there is to worry about with this digital streaming solution - Bond mini.”

“The Sphere 2 is a stylish speaker. It carries the same speaker configuration and has a similar design. However, the Tibo speaker has the upper hand, as it can be paired with another Sphere speaker to create a multi-room setup.”

“TIBO app is really easy to set-up and loud/noisy with a superb thump, thanks to a bass port at the back. I’m really impressed with it.”

“The TIBO SIA75 amplifier and Legacy 5+ floor speaker are the perfect pair for a party at home”

“Not only TIBO app is easy to set-up and just as easy to group with other Kameleon speakers to create a multi-room audio system.”

“Using the TIBO App I am straight into my listening playlists, the App is pretty intuitive.”

“Kameleon Touch Sound performance is good, high and mid tones are crisp and precise.”

“Sphere 2 the bass in this thing is mighty, and the volume is louder than you’re likely to ever want or need in a home environment.”

“Kameleon Touch the sound and build quality is good, I like that you can interchange the panels to suit your mood and it has Alexa built in.”

“The TIBO Kameleon 6 speaker even has five presets that you can assign to various streaming services and playlists!”

“You can connect TIBO Sphere 6 speaker either via Wi-Fi or Bluetooth but there's also an auxiliary port so you can play music stored on devices that don't have Bluetooth or Wi-Fi.”

Kameleon

We have given the Kameleon its name from the well-known animal, which changes colour in seconds. The TIBO Kameleon range does the same. With each of the product you get three sets of end panels enabling you to match the decor of your home for each room.

The range consist of three Smart Audio speakers where the smallest, Kameleon Touch, includes Amazon Tap to Talk function enabling you to set alarms, timers, get answers, order food etc. The larger two Smart Audio speakers, Kameleon 4 and 6, offer immense sound performance never seen on similar speakers with similar size. You can stream to all products via Bluetooth or Wi-Fi or use Line inputs for connecting external sources like TV, turntable etc. Each product feature 5 different presets for storing your favourite Worldwide internet radio stations.

The TIBO Kameleon products are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

Choros

TIBO Choros range features four separate Smart Audio speakers which work individually or can be played as a group. The Choros range was developed with the space conscious user in mind by creating a range of speakers with a limited footprint without compromising on the TIBO sound quality.

The smallest speaker in the range, Choros TAP features Amazon Tap to Talk technology enabling you to set alarms, timers, get answers, order food etc. The Choros Porta is a great choice where space is limited and for bringing along on holidays etc. Choros 4 & 6 both offer fantastic room filling sound and you can even charge your mobile device from both products.

You can stream to all products via Bluetooth, Wi-Fi or Line inputs for connecting external sources like TV, turntable etc. Each product features 5 different presets for storing your favourite Worldwide internet radio stations.

The TIBO Choros products are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

Sphere

When designing the contemporary Sphere range - 2, 4 and 6, we wanted to set new standards for portable sound performance without compromising on sound quality especially the bass response area. Each product offers a chargeable battery with more than 8 hours music playback. Due to the portability, they can be enjoyed everywhere. The Sphere is available in multiple colours. You can stream via Bluetooth when you are out and about and connect the Sphere to Wi-Fi at home. Each product has Line in for connecting external sources such as TV etc. and offers 5 different presets for your favourite Worldwide internet radio stations.

The TIBO Sphere products are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

Vogue

The Vogue speakers show TIBO's long tradition in creating great designed products by using traditional craftsmanship. Both Vogue 1 and 3 have a traditional design with portability, which has never been seen before in affordable Smart Audio products. The construction of the Vogue 3 takes several days to hand make due to the curved cabinet and overall structure. By using rounded cabinets, we have ensured no standing waves inside the cabinets - Leading to perfect bass performance, which can be very difficult to achieve in portable speaker. The Vogue range is a great choice where space is limited and for bringing along on holidays etc.

You can connect to both products via Bluetooth, Wi-Fi or Line inputs for external sources like TV, turntable etc. Each product features 5 presets for storing your favourite Worldwide internet radio stations.

The TIBO Vogue products are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

Traditional Hi-Fi With A Modern Twist

We believe that the best sound is created in stereo, which is the reason why we have stuck to our beliefs and built a range of traditional Hi-Fi but added a modern twist by including Wi-Fi streaming to most of the TIBO Classics. When you use a TIBO Classic Smart Audio amplifier, we have ensured that our long tradition in creating great sounding Hi-Fi separates will continue. We are sure you will not be disappointed when listening to our new Smart Audio amplifiers. A great feature for all Smart Audio amplifiers is the option to share connected separates and TV all over the home so you can enjoy undisturbed sound wherever you find yourself in the home.

With a range of three different amplifiers, ranging from the compact 2 x 50W SIA50 to the 2 x 150W powerhouse combination of Smart Streamer / Power Amplifier, we are sure you will find a product matching your criteria for perfect sound.

The TIBO Classics are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

Simple, but so advanced.....

The TIBO SIA75 with a pair of Legacy 3+ is all you would ever need for Internet Radio, Bluetooth and Wi-Fi stereo streaming in high resolution audio format

Worlds first High-End Wi-Fi and Bluetooth music system features TIBO Smart Streamer - pre-amplifier and PA150 - power amplifier combined with Legacy 5+ floorstanding speakers

Hi-Fi Loudspeakers

Hi-Fi loudspeakers are close to our heart at TIBO. We have more than 60 years of experience in building affordable great sounding handcrafted speakers. Even in today's World, we believe the best sound is achieved through a good pair of stereo speakers.

Our passive speakers are divided into two ranges - Harmony and Legacy. Harmony offers great three ranges of budget Hi-Fi speakers available in contemporary black and white ash. The Legacy range consists of three speakers, available in both light oak and black ash. Legacy offers incredible bass due to the downward facing bass reflex ports, used on both bookshelf speakers making them easy to place on a shelf etc.

Bond

The TIBO Bond range offers you an easy upgrade to Wi-Fi and the TIBO Ecosystem. We have created four great add-ons each built with an individual personality albeit part of the TIBO Ecosystem. You can connect Bond Mini to any traditional amplifier/receiver or Bluetooth speakers and you will have high resolution audio streaming in seconds. Alternatively add a Bond 2 and on top of Wi-Fi you will be streaming Bluetooth. We have added a 7 pin DIN connector for connecting powered active speakers without having the need for any Hi-Fi stereo system taking up valuable space. Bond 3 features an optical out connection enabling you to stream music digitally to an existing amplifier. Furthermore, it comes with an USB input, by which you can stream music files over your network. At the top of the Bond range sits the TIBO Bond 4, which not only have Bluetooth and Wi-Fi Streaming but also features a built in digital 2 x 25W amplifier, which is perfect if you have a great pair of stereo speakers you really love.

The TIBO Bond products are part of the TIBO Hi-Fi Ecosystem and can be added to a smart home audio set-up by using the TIBO app. You can stream Spotify, TIDAL, Napster, TuneIn, iHeartRadio and many more. Music can be played to one TIBO product and different music to another or play the same source across the whole home.

TIBO

TI435 Integrated Amplifier

Plus

The TIBO range of Plus speakers is developed with a single purpose in mind - Namely to create an easy to install stereo Hi-Fi solution offering great sound and a wealth of connections. By combining an active speaker with a passive speaker, we have created a good value alternative to the TIBO Smart Audio range. Just Plug and Play. Flawless as speakers for your PC, ideal to use with turntable and a fantastic way to improve the sound of your TV, making them perfect for audiophiles and the design conscious alike.

Simply pair the speakers using the included remote control with your Bluetooth enabled device and stream your music library, internet radio, or services like Spotify, TIDAL etc at CD sound quality. In addition to Bluetooth, the Plus range comes with standard RCA phono and 3.5mm connections to connect just about any Hi-Fi source. For TVs, CD/DVD and Blu-ray players there is an optical digital input.

If you would like the Plus speakers to be part of your TIBO Ecosystem - Simply add a TIBO Bond Mini.
